IMDC

Vision

We are simply a small group of people with some shared ideals and beliefs in the context of Mendocino as a community, specifically concerning how this community can govern itself to the greatest benefit to the individual members of that community, and hence to the whole.

Mission

As a political party we seek to realize this vision by striving to elect officials to office that share our ideals and will work to achieve our long term vision.

Goal

Our overall goal is to bring our government into harmony with the well being of our citizens. This goal evolves with each election cycle and the candidates that step into the fray. Our near term goals are defined in the context of each election. But our overall, Mission remains to elect candidates to office that will best advance our effort to meet our goals and thus move towards realizing our vision.
